EXPERIENCE

Senior Product Manager

Brightidea | 07/2024 – Present | San Francisco, CA

- Shipped Whiteboard's AI feature suite, including AI brainstorming, one-click organize, smart matrix, and PRD / business-case generation, reaching 1,000+ unique users in the past year and now a lead topic in client conversations and sales/CS enablement.
- Built an AI-augmented PM workflow (Claude + MCP) spanning the full cycle: call transcripts → PRDs → Jira tickets → clickable prototypes with complete UX flows → local-dev hand-off to engineering.
- Delivered the Project Room redesign in 35 story points, work that traditionally runs 150+, by designing and prototyping it myself; cut PRD-to-tickets from days to hours and compressed design-review cycles.
- Own the Hackathon participant experience, including onboarding wizard, team building, and Project Room, for a platform running 500+ participants per event; scoped and shipped a Project Room Activity / History module (audit filters, CSV export) to the Summer 2026 release.
- Lead cross-functional design and engineering partners to take large features from concept to release.

Product Manager

Brightidea | 08/2021 – 07/2024 | San Francisco, CA

- Own end-to-end strategy, roadmap, and delivery for Whiteboard, Brightidea's real-time multiplayer ideation canvas used by teams at Adobe, Amazon, Nike, and LinkedIn.
- Joined to stand up a new product line, owning prioritization, PRDs, and agile delivery with stakeholders.
- Own and continuously expand Brightidea's Free Trial program across 19 enterprise products, including sign-up forms, nurture emails, payment / product types, and template configuration.
- Built the self-serve trial-to-paid engine from scratch to \$123K in net revenue on 43K form visits and 8,000 signups (18% conversion), largely organic with minimal marketing.
- Implemented chatbots, onboarding flows, and in-app messaging to drive trial activation and conversion.

Product Manager

Famous (now Amaze) | 01/2018 – 01/2021 | San Francisco, CA

- Owned product roadmaps and full-lifecycle execution for Famous, a browser-based tool for building interactive, animated designs, partnering with design and engineering on nearly every major product decision.
- Authored PRDs and prioritized the feature backlog, turning user needs and product vision into clear, buildable specs.
- Shipped Asset Bar, a quick-access tool surface that let new users create designs dramatically faster.
- Led the Animation + Interaction Refresh, streamlining the core creative workflow so users could build interactive designs in minutes.
- Hands-on onboarded every early user from the first alpha through beta user #200, using their feedback to shape early product decisions.
- Created FAQs, video guides, and full-length design-build tutorials to help new users get productive faster.
- Ran a weekly Friday all-hands, bringing in designers from major tech companies to share their careers and work.

Caregiver / Creative Director

Fight2Breathe | 01/2014 – 01/2018 | San Francisco, CA

- Primary caregiver to a Cystic Fibrosis patient, taking her from surviving to thriving through hospice, two double-lung transplants, and 70+ procedures.
- Served as Creative Director for the organization's 501(c)(3) charity arm, producing branded apparel and media content.
- Led partnerships for events, public speaking engagements, community gatherings, and giving-back initiatives.

SUMMARY

Senior Product Manager with 8+ years shipping design-led, collaborative software across whiteboarding, hackathon, and enterprise growth surfaces. I own Brightidea's Whiteboard end to end and built an AI-augmented workflow that shipped full product features in 35 story points versus a typical 150+. I built the self-serve free-trial funnel behind 43K visits and 8,000 signups at 18% conversion, and ship AI ideation features now central to client and sales conversations.
